

Health & Social Care Pre-course study.

You need to arrange a voluntary placement in a care setting relevant to the career you are hoping to pursue in relation to this course.

If you are taking this course with no career in mind then choose a care setting that interests you the most

You should make contact with the business / care setting you want to do your placement with but tell them you will have to wait until you have your timetable in September before you can arrange a regular day to attend if this is during the school day for example if you are looking at Primary Education or Child Care.

It is important you do this in advance so that you can hit the floor running in September. Your assignment briefs will reflect your vocational placement.

Remember, this is voluntary work rather than work experience.

If you need any more information you should contact Mrs Richardson.

Placements also stand you in good stead for university interview as they have experienced the work place.
